Subject: RE: EVOQUA WATER TECHNOLOGIES : TECHNICAL PROPOSAL

Matt,

I neglected to mention in the Technical Proposal I sent over that the approximate footprint of the system will be 100' x 60'. The shape is flexible and the equipment can be oriented and/or separated to accommodate the site conditions.

I have also attached some additional details on the Actiflo system and the SCU and ASG media.

Please let me know if you require any additional information at this time.

Best Regards,
Curtis.

Matt,

Attached please find Evoqua's technical proposal and associated process flow diagram for treating the Gold King mine discharge.

We are prepared to begin moving the assets and personnel described in this proposal once directed.

We look forward to discussing this proposal with you, either in person or via conference call at your convenience. Please contact Mark, Ben or myself to arrange a time that works best for you.

Subject: EVOQUA WATER TECHNOLOGIES : TECHNICAL PROPOSAL

Hello Matt

Our team is wrapping up our technical proposal for general metals reduction for the Gold King Mine application. Our hopes are to have that emailed you tonight, or the latest, tomorrow morning. After you have received that, we would like to arrange a conference call with you and the EPA representatives for later this week to discuss.

Were you able to ship the 5 gallon water sample to our Roseville, MN facility? I want to give a notice to our staff to keep their eyes open for its arrival if so.

Thanks.

With best regards,

Mark Korzenecki
